

«EVCC-GSM-003»

Charge Station Control Module EVCC-DC-003/EVCC-AC-003, EVCC-AC-0031, EVCC-AC-005

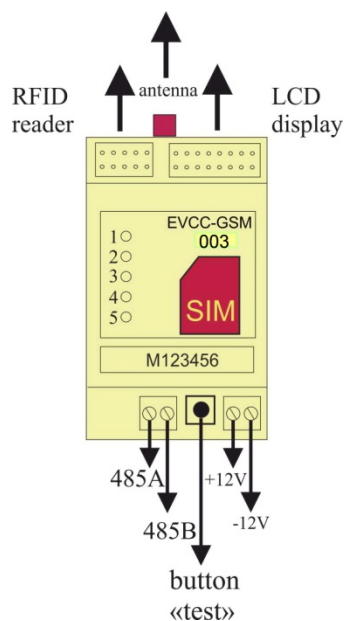

**«Autoenterprise»
Ukraine**

Product Highlights

- Support for 2G mobile networks
- RS485 interface support
- Support for LCD screen in 2x20 character format
- Series Controller Support EVCC-DC-003, EVCC-AC-003, EVCC-AC-0031 и EVCC-AC-005
- RFID Tag Reader Support

Pin assignment of the communication module EVCC-GSM-003

3,4	RS-485	Interface bus	
8	+ 12	+12 V power bus	max 0,3 A
9	GND	Common Power Bus	

LED purpose.

- 1 - connected RFID reader;
- 2 - data exchange with a central server in a GSM network;
- 3 - connection to the central server;
- 4 - RS-485 communication;
- 5 - GSM modem power control.

Спецификация коммуникационного модуля EVCC-GSM-003

№ п/п	Наименование	Количество
1	Plastic case DIN 53x90	1
2	Display board	1
3	Management board	1
4	Board to Board Connector	1
5	Cable for connecting the control board to the antenna connector SMAx100 мм	1

Marking the communication module EVCC-GSM-003
